

LED LICENSE PLATE LAMPS

(2019-2021 RANGER) 

INSTALLATION INSTRUCTIONS

CONTENTS

(1) Pair of License Plate Lamps

TOOLS REQUIRED

Flathead Screwdriver

STEP 1

Locate the license plate lamp inside the rear bumper. Using a narrow flathead screwdriver, insert the screwdriver into the gap located at the top of the lamp. Gently pry down to bend the mounting clip down while pulling the light out of the bumper.

STEP 2

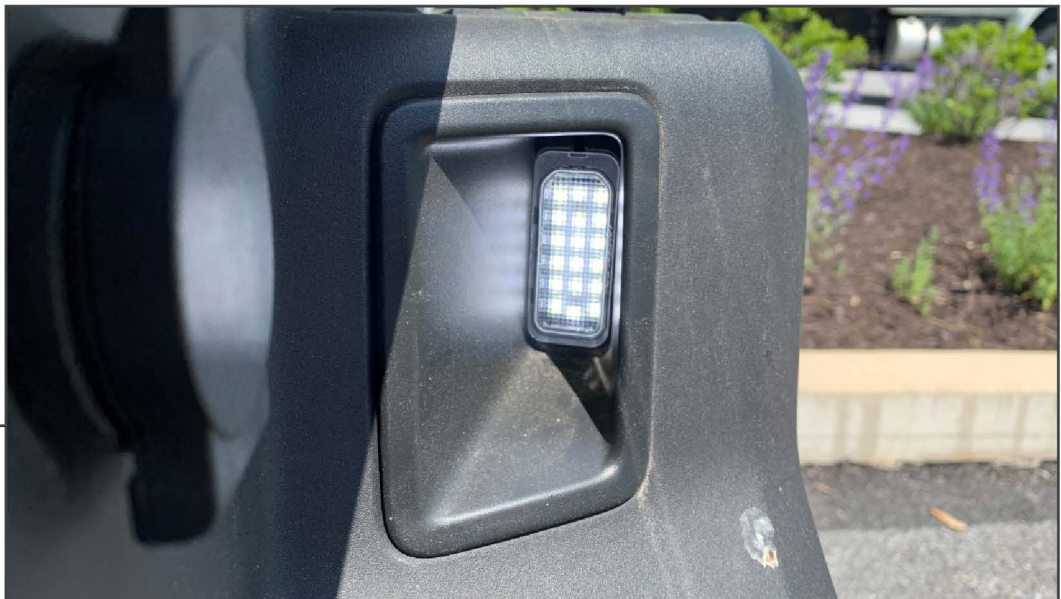

With the lamp housing removed from the bumper, untwist the light socket from the lamp housing. Remove the light bulb from the light socket.

STEP 3

Plug the LED license plate lamp into the light socket. Test lamp for functionality.

STEP 4

Install the LED license plate lamp into the bumper. Install the lower portion first, then hinge the top to secure the lamp into the bumper. Repeat steps 1-4 to the opposite side of the vehicle.

Installation is now complete.
