

LED THIRD BRAKE LIGHT

(2009-2018 1500)

(2010-2018 2500/3500)

INSTALLATION INSTRUCTIONS

CONTENTS

(1) LED Third Brake Light

TOOLS REQUIRED

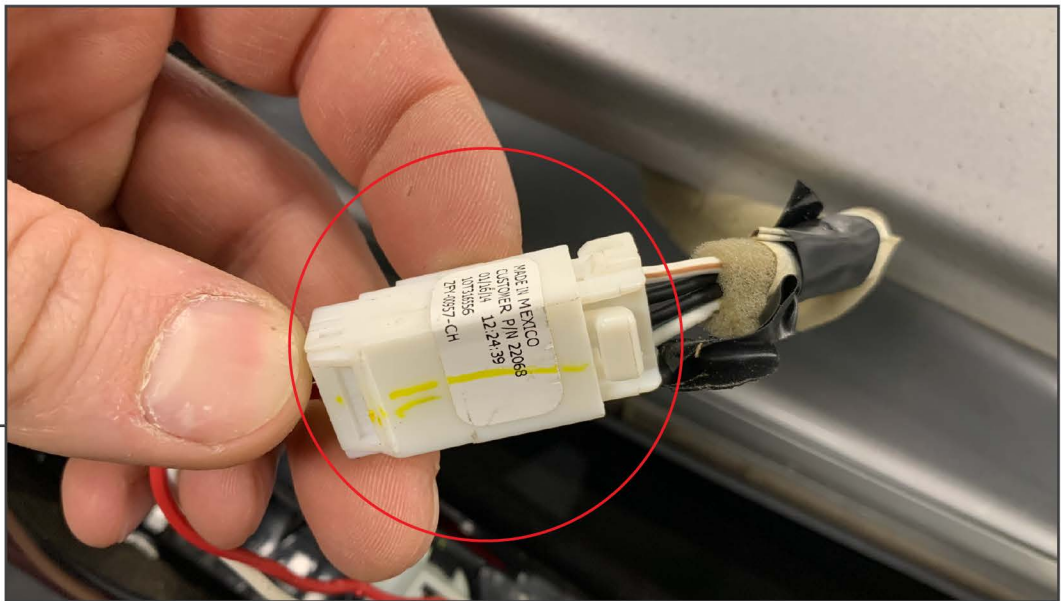

Phillips Screwdriver

SKU: R117632 R117633

STEP 1

Using a Phillips screwdriver, remove the (2) screws securing the factory third brake light to the vehicle.

STEP 2

Pull the brake light away from the vehicle to access and unplug the electrical connector.

STEP 3

Plug the LED third brake light into the factory electrical connector. **Note: The toggle switch will switch the brake light from solid to 5x flash and then solid. Test the light for desired functionality prior to reinstalling the factory screw.

STEP 4

Secure the light to the vehicle using the factory screws.
