### TOOLS REQUIRED

---

- 9/32" Socket
- T-20 Torx Socket
- Ratchet

SKU # R124128

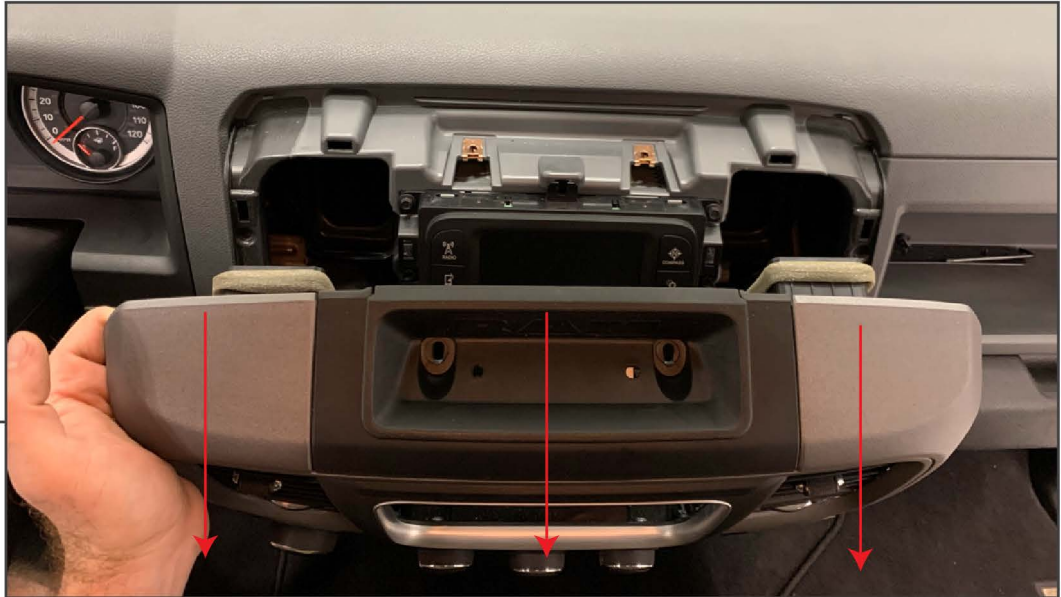

## STEP 1

Lift and remove the rubber mat from the storage tray above the radio.

## STEP 2

Remove (2) T-20 Torx screws from the top of the dashboard radio bezel.

## STEP 3

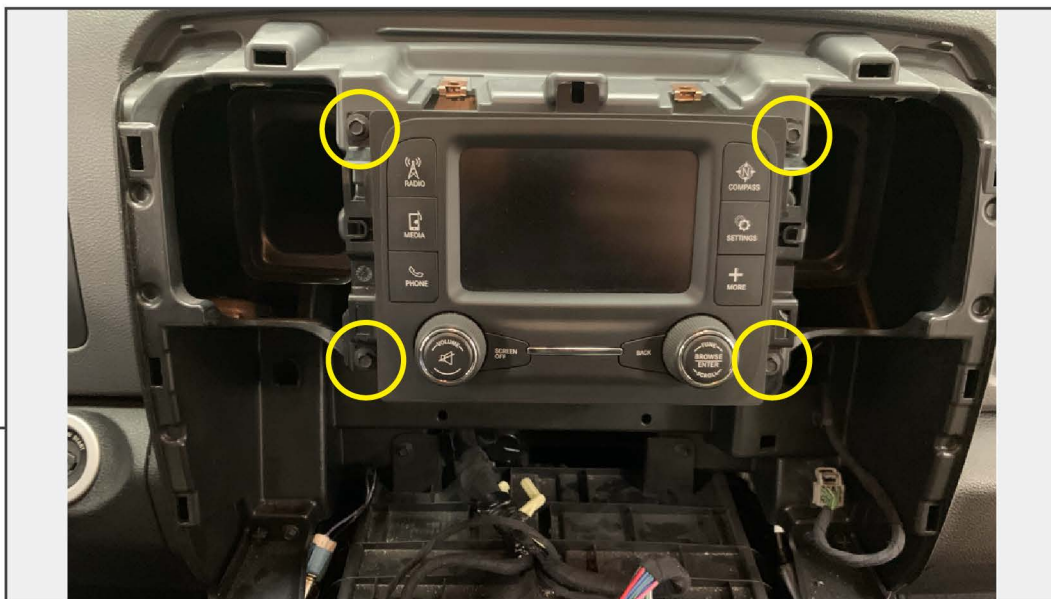

Firmly pull the radio trim bezel from the dashboard.

## STEP 4

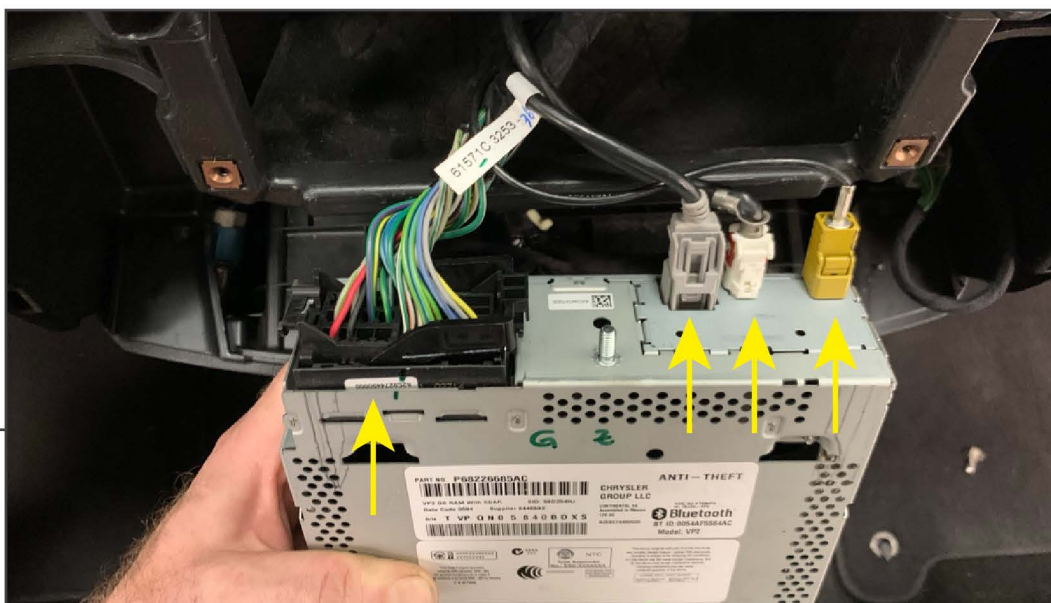

Turn the radio trim bezel to the side and unplug (5) electrical connectors from the back of the bezel.

## STEP 5

Remove (4) 9/32" screws from the original radio assembly.

## STEP 6

Unplug the (4) electrical connectors from the vehicle radio assembly.

## STEP 7

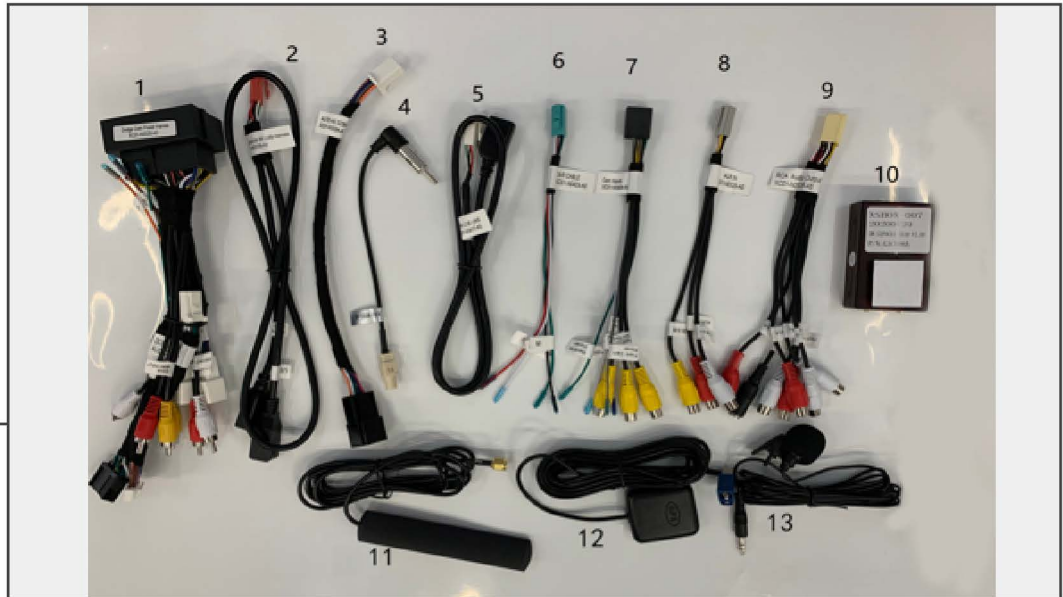

Remove (10) Phillips head screws from the backside of the original radio trim bezel. Remove the A/C control module from the radio trim bezel.

## STEP 8

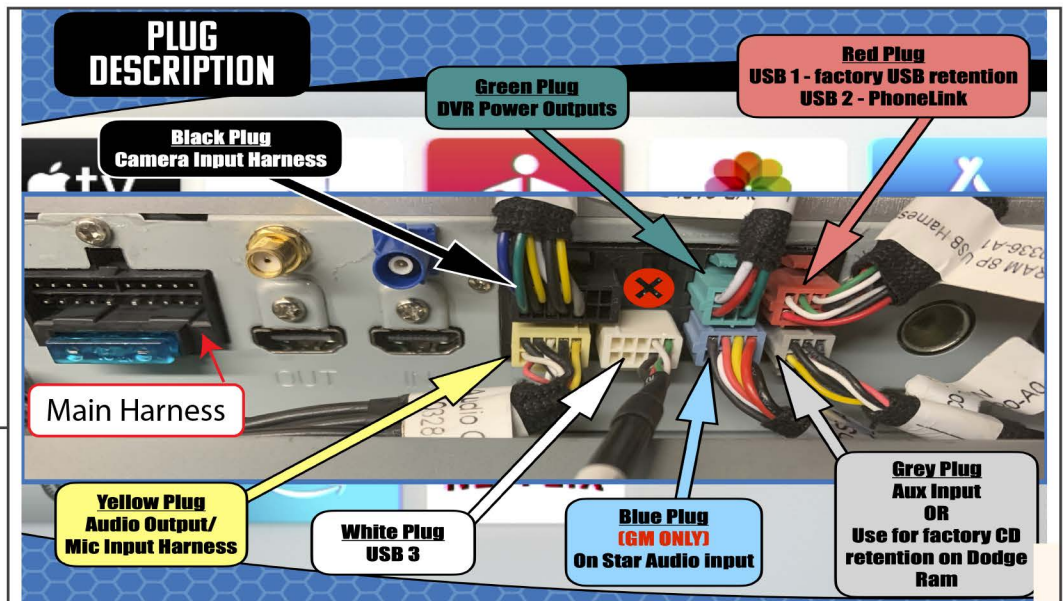

Install the new radio into the radio trim bezel, securing into place using the (10) original Phillips screws.

## STEP 9

Identify the included wiring harnesses.

## STEP 10

Connect the main harness to the back of the display unit. The main harness is required for the installation. \*\*Please Note: Not all applications will use every harness, and not all plugs on every harness will be used.

---

## STEP 11

Please Note: Not all applications will use every harness, and not all plugs on every harness will be used.

Installation: Route all wiring harnesses so that they do not interfere with the display and inner dash structure, it is a tight fit, but it does fit. Repeat Steps 1-4 in reverse order to complete the installation.
