MADE IN

AMERICA

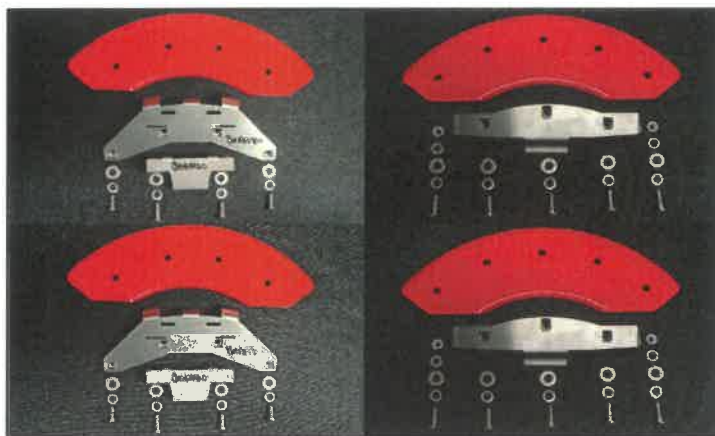

BY AMERICAN WORKERS WITH
EXPERT QUALITY CRAFTSMANSHIP

 **TOOLS REQUIRED** Lift or jack with jack stands, lug wrench, torque wrench and a 4mm Allen wrench.

02/13/2018

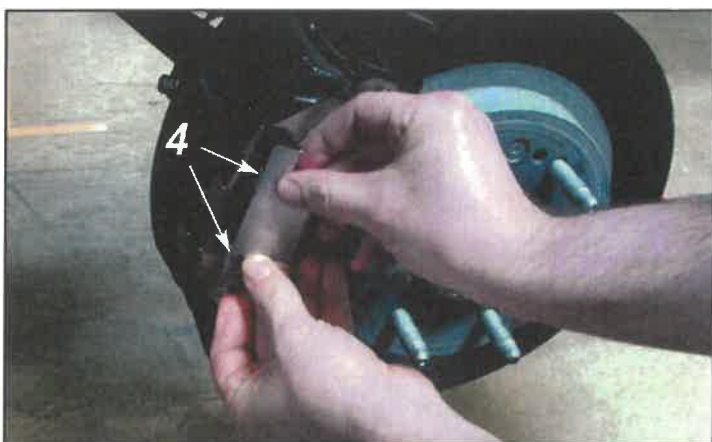

Notes to the Technician/Installer:

E&G is proud to present this package to you and reminds you that for technical information, contact technical assistance at 814-454-7396. Do not attempt the installation of any E&G product without first reading the detailed instructions. **E&G will not warrant damaged parts or the vehicle due to altered installation**

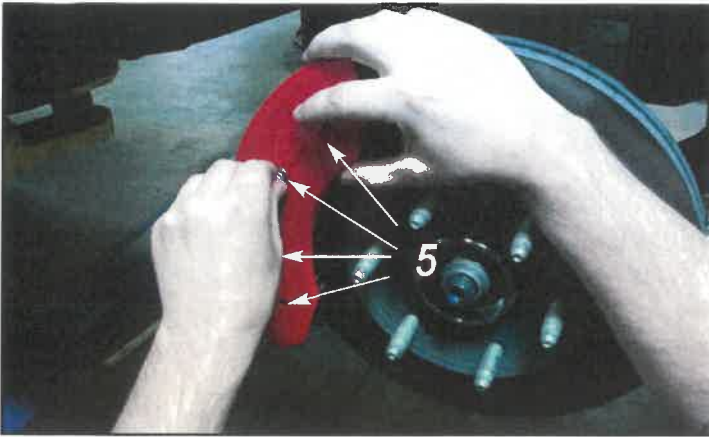

1. Inspect and verify that all components needed to install the brake caliper covers are accounted for prior to installation. Lift the vehicle and remove the wheels to access the brake calipers. If using a jack, you must use jack stands. Do not rely on the jack to support the vehicle. If the jack fails, serious injury or death may occur.

2. Align the front caliper cover base mounting brackets over the front calipers, hooking the upper mounting tabs into the slots in the top of the calipers.

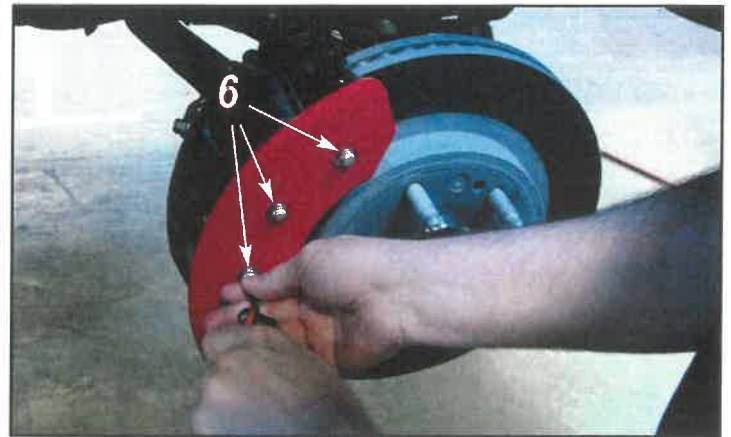

3. Push the face of the front caliper cover base mounting brackets down until the pre-installed cage nuts fit over the face of the calipers. **IMPORTANT: On some models, you may need to pull the bracket from the bottom to keep the cage nuts from catching on the face of the caliper.**

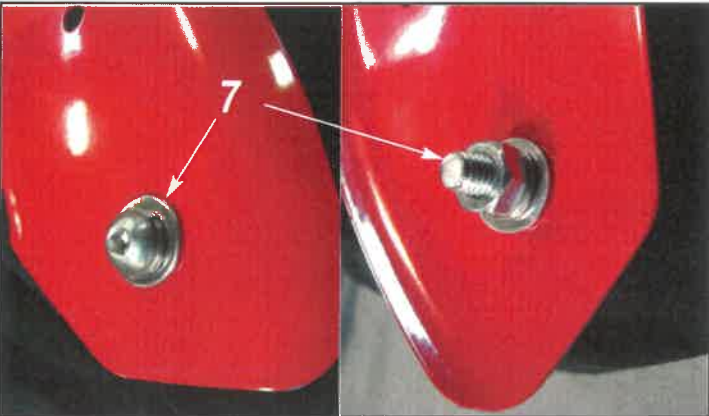

4. Align the front caliper cover spacer bracket tabs into the slots in the base mounting brackets installed in the previous step. Push in on the front caliper cover spacer brackets until the mounting tabs make contact with the face of the factory calipers.

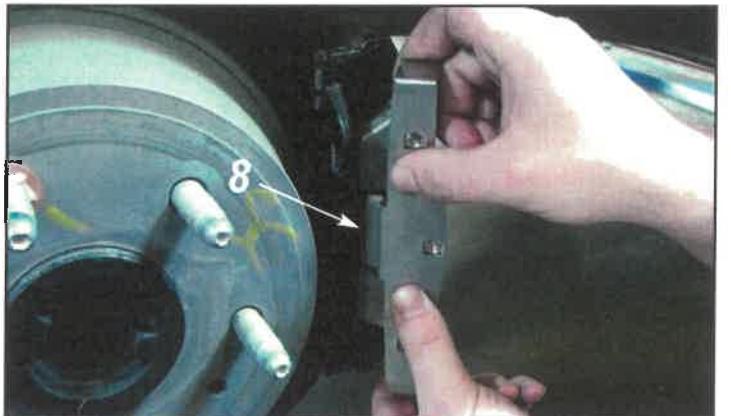

5. Align the front caliper covers over the mounting brackets and install the supplied flat washers, lock washers and 1/4-20 x 3/4" allen head bolts into the preinstalled 1/4-20 cage nuts in the base mounting brackets.

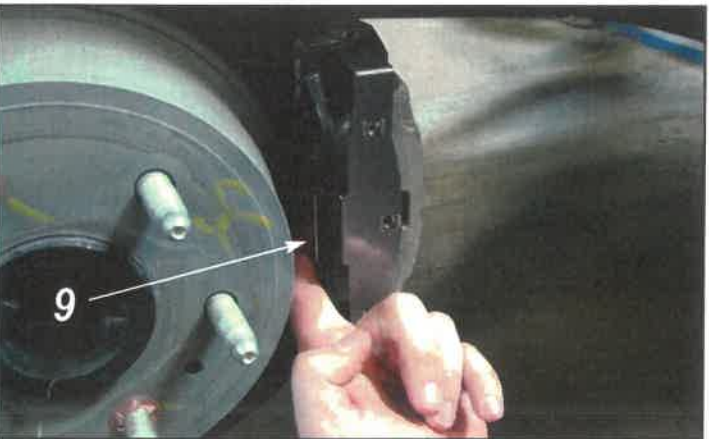

6. Make sure the caliper covers are properly aligned and tighten the mounting hardware to finish the front caliper cover installation.

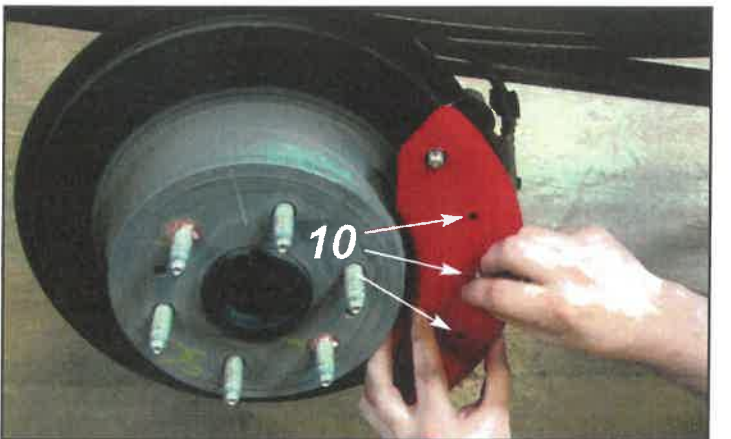

7. Begin the rear caliper cover installation by first installing the outer supplied hardware. Install the supplied flat washers and lock washers onto the supplied 1/4-20 x 3/4" allen head bolts, pass the bolts through the outer holes in the caliper covers and install flat washers, lock washers and 1/4-20 hex nuts. Tighten until the hardware is secure.

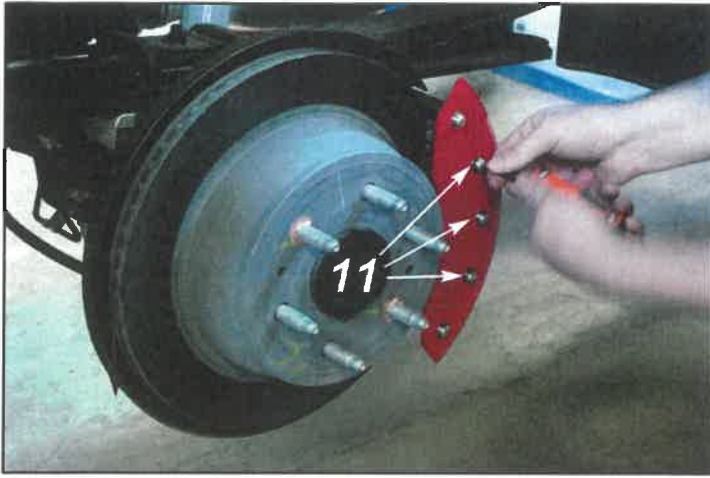

8. To align the rear caliper mounting brackets, rotate the center mounting tab on the mounting brackets underneath the factory caliper carrier brackets. Pry out on the sides of the bracket as you press in on the center to help hook the mounting tab around the caliper carrier brackets.

9. Press the center mounting tab tightly against the back of the factory caliper carrier brackets.

10. Align the rear caliper covers over the mounting brackets and install the supplied flat washers, lock washers and 1/4-20 x 3/4" allen head bolts into the pre-installed 1/4-20 cage nuts on the mounting brackets.

11. Make sure the calipers covers are properly aligned and tighten the mounting hardware to finish the rear caliper cover installation. Reinstall the wheels, torque the lug nuts to manufacturer's specifications and lower the vehicle to finish.

E&G Warranty Information:

E&G Corporation, LLC. warrants its parts and products to be free from defects in material, workmanship or finish for Thirty- Six (36) months from the date of shipment by E&G. This warranty is limited to the repair or replacement, at E&G's option, of the defective part or product. Full E&G warranty information is available online @ www.egclassics.com. Just click on the product warranty icon.

For E&G Product Returns:

Please contact the authorized E&G Dealer where you purchased our product from in regards to any workmanship or warranty claims. All items returned to E&G must have a return authorization number issued by us for inspection or a defective product and or warranty issue. All merchandise sent back to E&G without proper paperwork or authorization will be rejected and returned.
