

# LED LICENSE PLATE LAMP SET

(2014-2018 SILVERADO)

---

## INSTALLATION INSTRUCTIONS

### CONTENTS

---

(1) LH LED Light  
(1) RH LED Light

### TOOLS REQUIRED

---

7mm Socket  
Socket Wrench

## STEP 1

From behind the bumper locate and unclip the license plate light plug.

## STEP 2

Twist the bulb socket counter clockwise and remove it from the light housing. Pull the bulb from the socket.

## STEP 3

Using a 7mm socket, remove the screw securing the housing to the bumper.

## STEP 4

Compare the light housing removed with the replacement LED lights. Re-install the housing that matches. Press the LED light wiring connection into the stock light bulb socket. Plug the vehicle wiring harness into the factory bulb socket. \*\*Note: Match the location of the black(ground) wires when pressing the LED connection into the socket. Test the light for functionality. If the light doesn't work, switch the LED connection in the socket 180 degrees. Then twist the socket into the LED light housing to complete the installation.
