Premium Neoprene Seat Covers Installation Guide

1999-2006 Chevrolet Silverado

Front Seat Covers:

1. Lay out the seat covers on a clean surface to determine the seat cover location.
2. Remove the head rest from the seat. Drape the backrest portion of the seat cover over the backrest on the seat, making sure the seat belt is on top of the cover.
3. Route the lower seat cushion portion of the seat cover towards the seat cushion. Wrap the seat cover over the seat cushion. Route the straps under the seat.
4. Secure the seat cover to the seat by latching and tightening the straps under the seat. Ensure the straps do not interfere with the seat's slider or electrical connectors.
5. Install the head rest covers onto the head rest. Reinstall the head rest onto the seat.

Rear Seat Covers:

1. Remove the rear head rests. Drape the backrest portion of the seat cover over the backrest on the seat. Tuck the bottom of the backrest seat cover in between the back rest and the lower seat cushion.
2. Lower the backrest and secure the backrest cover into place using the provided straps.
3. Drape the lower seat cushion cover over the seat cushion. Tuck the rear portion under the lower seat cushion. Lift the lower seat cushion and tighten using the provided straps.
4. Install the head rest covers onto the head rest. Reinstall the head rest onto the seat.

Installation is now complete.
