

LED Mirror Puddle Lamps Installation

Guide 2019-2021 SILVERADO

1. Locate the vehicle mirror puddle lamp under the mirror. Take note to the cutout in the plastic on the side of the puddle lamp.
2. Using a small flathead screwdriver, depress the plastic retaining tab, and pull the tab towards the puddle lamp while pulling downwards to release the light from the mirror. **Note: Use the new puddle lamp to identify plastic retaining tab functionality.**
3. Once released, pull the light downwards to gain access to the wiring on the backside of the light. Unplug the original puddle lamp.
4. Plug in the vehicle puddle lamp wiring harness, test functionality.
5. Press the new LED puddle lamp into the mirror, ensuring the plastic retaining tab clicks into place.
6. Repeat steps 1-5 to the opposite of the vehicle. Installation is now complete.
