

GM FRONT UPPER CONTROL ARM DIFFERENCES

NOTE! Please make sure you compare your OE arm to the below images BEFORE installation!

Stamped Steel UCA

OE Stamped steel, smooth shiny surface, hollow inside.

Requires part number FO-G703-1FU

Aluminum UCA

OE Aluminum, easy to determine as it is silver in color.

Requires part number FO-G703-1FU

Cast Steel UCA

OE Cast steel, slightly textured surface, one single piece, solid.

Requires part number FO-G703FU

Notes

Please note, Freedom Offroad upper control arms are designed to reduce the ball joint angle associated with lifted trucks. These DO NOT resolve control arm to droop stop contact issues, the only resolution for that issue is modification of the droop stop. Perform at your own risk! Returns are NOT accepted if the arm has been installed.
