

# LED TAILGATE STEP LIGHTING

(2019-2023 SILVERADO / SIERRA WITH MULTI-PRO  
TAILGATE)

---

## INSTALLATION INSTRUCTIONS

### CONTENTS

---

(2) Light Assemblies  
(1) Wiring “T” Harness

### TOOLS REQUIRED

---

Plastic Panel Removal Tool

---

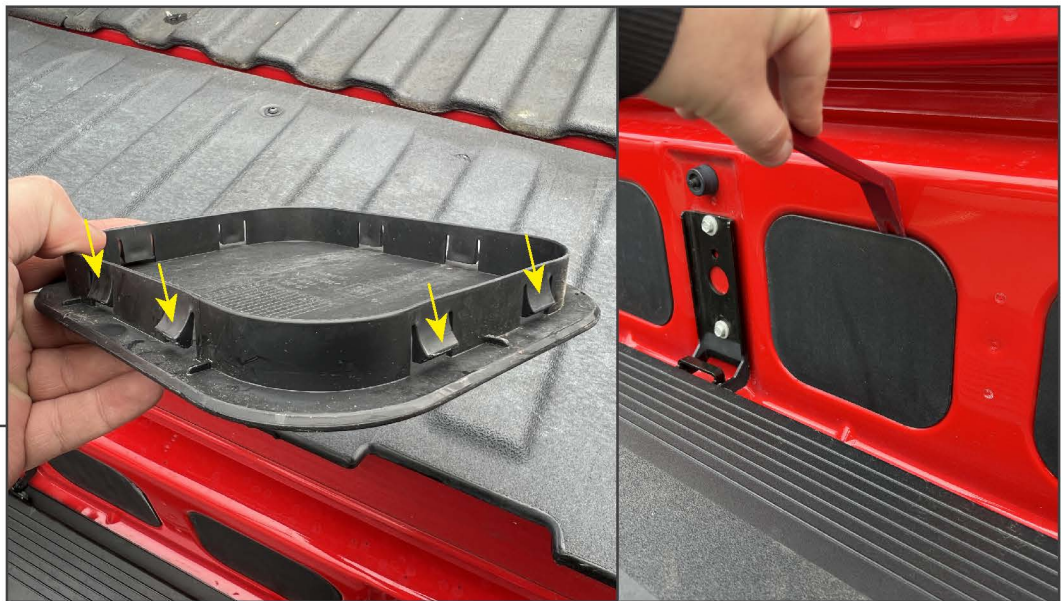

**STEP 1**

Fold the vehicle tailgate step. Locate the (4) plastic panels in front of the step. Out of the (4) panels, select (2) panels to install the included lights.

---

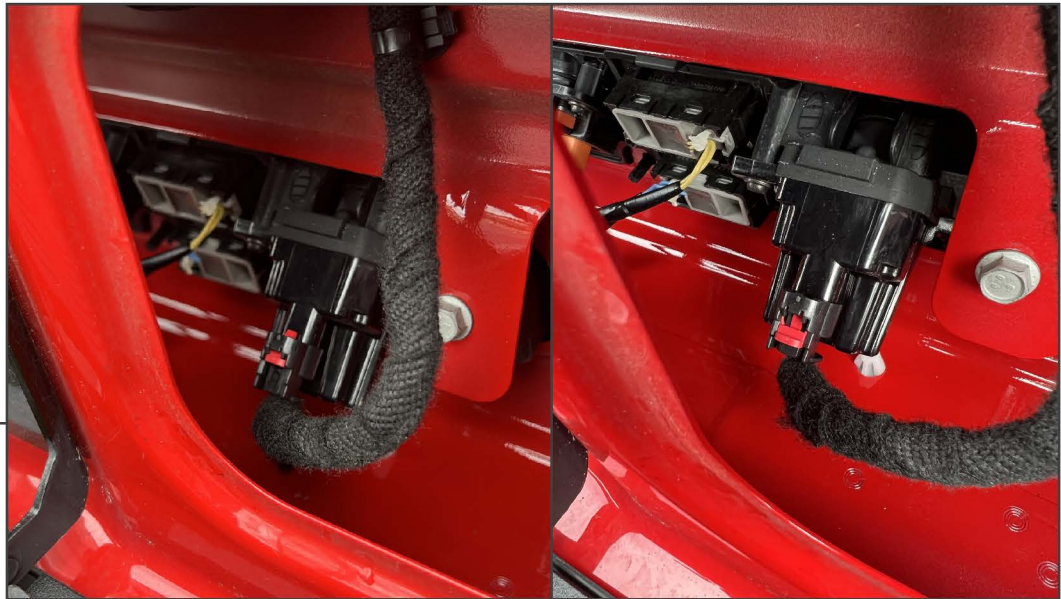

**STEP 2**

Using a plastic panel removal tool, work the tool around the perimeter of the plastic panels to dislodge the panel from the tailgate.

Note: The panels have a tight fit to the tailgate, moderate force may be required for removal.

**STEP 3**

Locate the tailgate latch electrical connector. Slide the red lock down, then press the black tab to unplug the connector from the tailgate latch.

**STEP 4**

Plug in the included “T” harness in between the tailgate latch harness connector and the vehicle wiring harness. Then, route the LED light harness leads out of the tailgate holes.

Neatly route the wiring harness inside the tailgate.

**STEP 5**

Plug the “T” harness into each LED light assembly, and slide the gray lock to secure the connection. Then, press the LED light assembly into the tailgate.

**STEP 6**

The lighting will power on with the vehicle cargo lamp.

Installation is now complete.
