

LED LICENSE PLATE LAMPS

(2017-2022 FORD F-250 / F-350)

INSTALLATION INSTRUCTIONS

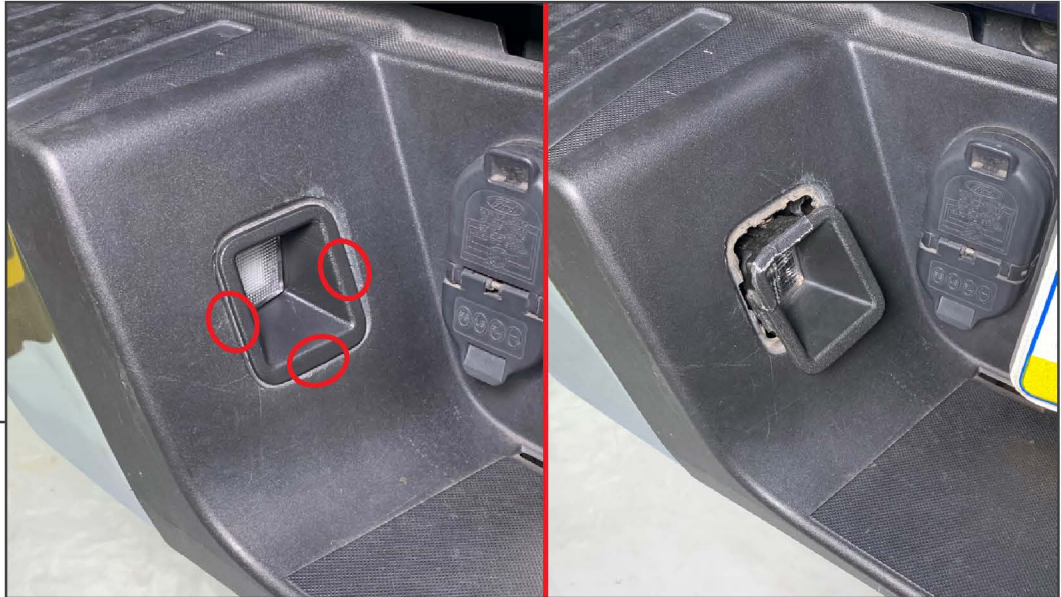

CONTENTS

- (1) LH License Plate Lamp
- (1) RH License Plate Lamp

TOOLS REQUIRED

Flathead Screwdriver

STEP 1

Using a flathead screwdriver, depress the (3) inner plastic tabs to release the license plate lamp housing from the rear bumper.

Note: Pressing tabs from the back side of the bumper may be necessary.

STEP 2

Pull the license plate housing through the front of the bumper, revealing the light socket. Twist the light socket counter clockwise to release the socket from the housing.

STEP 3

Remove the light bulb from the light socket.

STEP 4

Plug the LED license plate lamp into the vehicle light socket. Twist the light socket clockwise into the LED license plate lamp housing to seal the housing.

STEP 5

Align the top of the LED license plate lamp housing into the bumper, then press the remaining sides into the bumper to secure the light housing into place. Repeat steps 1-5 to the opposite side of the vehicle.

Installation is now complete.
