Rev. 3/18 Page 1

Part # 1235 2017-2018 Ford Super Duty

Notice: Install new, unpainted parts according to these instructions!

Then remove parts, paint them and re-install.

Painted or Altered Parts are Non-Refundable!

Step 1 | Tools: Panel Puller, Small Flathead Screwdriver | Fig.A

NOTICE- This step requires two people. Make sure you support the hood while you remove the struts

The first thing you need to do before installing your new Cervini's hood is remove the existing hood. Start by removing the wiring harness with a panel puller (we need a picture of this). Next, release the metal retaining clip on the gas strut as shown in Fig A. Finally, pop the end of the gas strut off the ball stud on both the hood and fender apron sides of the strut.

Step 2 Tools: Masking Tape, ¼ Drive Ratchet, 13mm Socket

NOTICE- This step requires two people. Make sure you support the hood while you remove the hinge nuts.

To remove the factory hood start by taping off the corners of your fenders to protect them. Wrap your hand around the back of the hood as shown in Fig.B. And keep constant pressure on the hood, pulling it away from the fenders, while removing the 13mm nuts. After the 13mm nuts are removed take off the hood and set it aside.

PART # 1235		
QTY	DESCRIPTION	HARDWARE#
8	PHILLIPS SCREWS	PHL/FH/BL/1.25
6	1/4-20 X 1" BOLTS	HEXWASH/GDC/1/4-20/1.0
4	LARGE WASHERS	FLAT/GDC/.281/.875/.125
2	LOCK WASHER	LOCK/ZN/.25/.5
2	GAS STRUTS	GAS SHOCK/006

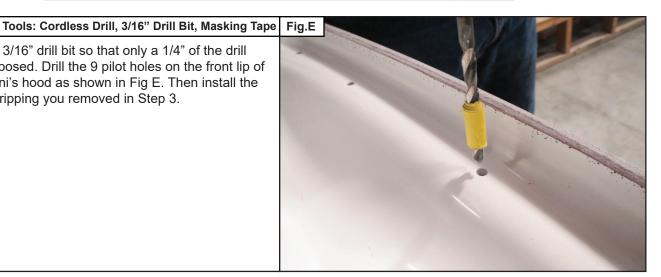

TOOL AND MATERIALS LIST		
QTY	DESCRIPTION	
1	10MM SOCKET	
1	13MM SOCKET	
1	3/8" SOCKET	
1	1/4" DRIVE RATCHET	
1	CORDLESS DRILL	
1	3/16" DRILL BIT	
1	MEDIUM STRENGTH LOCTITE	
1	PHILLIPS HEAD SCREWDRIVER	
1	SCISSORS	
1	SMALL FLATHEAD SCREWDRIVER	
1	SMALL PANEL PULLER	

Place the factory hood on a stand with the underside side facing up. Remove the weather stripping along the front lip of the hood with a small panel puller as shown in Fig.D. The weather stripping will be reinstalled on your Cervini's hood so take your time to avoid damaging the clips.

Step 4 Mask off a 3/16" drill bit so that only a 1/4" of the drill point is exposed. Drill the 9 pilot holes on the front lip of your Cervini's hood as shown in Fig E. Then install the weather stripping you removed in Step 3.

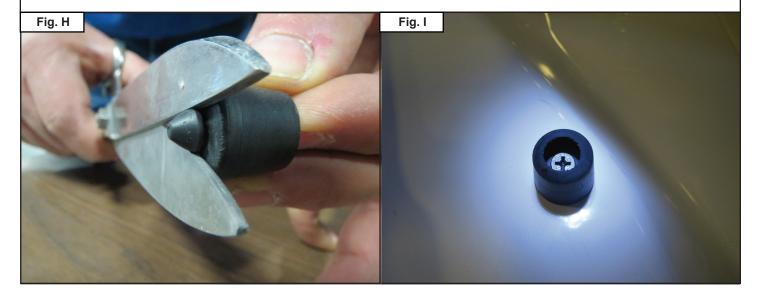

Step 6 Tools: Scissors, Phillips Head Screwdriver

Next you will need to remove the 8 rubber stoppers from the factory hood and cut off the nipples as shown in Fig. H. Your Cervini's hood is thicker then the factory hood so the stoppers need to be installed with the Phillips screw provided. Insert the screw through the stopper and tighten it to your Cervini's hood as shown in Fig. I.

NOTE: Do not over tighten the screws. Only hand tighten them until the head of the screw sits flush on the flat portion of the stopper

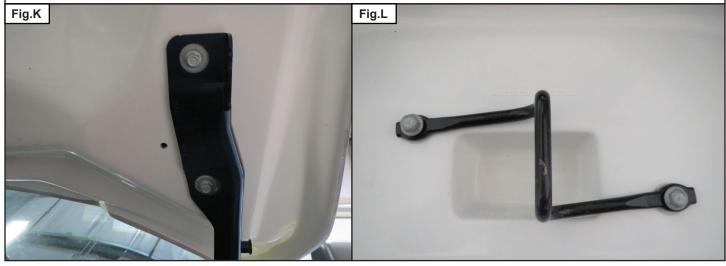

Step 7 Tools: ¼ Drive Ratchet, 10mm Socket, 3/8" Socket, Medium Strength Loctite

NOTICE- This step requires two people.

Now you're ready to install your Cervini's hood. Start by installing the 1"bolts and large flat washer provided through the hinges as shown in Fig.K. Adjust the hood until proper alignment with matching panels achieved. Next remove the striker bar from the factory hood by removing the 10mm nuts. Finally install the striker bar onto your Cervini's hood. Install the striker bar with the 1" bolts and lock washers provided as shown in Fig.L. (Apply a small amount of medium strength loctite® to the 1"bolts before you install them.)

Note: Do not install your Cervini's hood with the factory hardware. Doing so will damage your Cervini's hood and void your warranty.

Step 8 Tools: 10mm Deep Socket, 1/4" Drive Ratchet

Adjust primary latch if needed until the striker bar fits into the latch. Make sure when the hood is closed you can hear the striker bar "CLICK" into the latch. After you hear it click, test it to be sure it's working properly by grabbing the front edge of the hood and slowly pulling upward with steady even pressure. If the hood opens it's not adjusted properly; repeat this step until the hood cannot be pulled open after it's been closed.

WARNING: MAKE SURE THE SAFETY CATCH IS WORKING PROPERLY! To ensure the safety catch is working properly, close the hood, pull the hood release from inside the car and the hood will partially open. Slowly pull upward on the hood and jiggle it at the same time. If it opens without pulling the safety catch lever than the latch needs to be re-adjusted. The safety catch prevents the hood from opening in the event the primary latch fails.

Step 9

Once the hood is adjusted install the provided gas supports as shown in Fig. M. Install the underhood light as shown in Fig.N.
