

Thank you for your purchase of our new LED Pod Ditch Light Kit. CAD-designed to use existing mounting points, this kit is compatible with the 2022+ Toyota Tundra. Basic installation instructions are included below. **Please contact us if you have any questions.**

1. Working on one side of the vehicle at a time, mark the location of the hood hinges with tape and tape the edges of the hood to prevent scratching.

2. Remove the two 12mm bolts securing the hood hinge, while holding the back of the hood. We also highly recommend having someone else hold the front of the hood to make sure it doesn't close when the bolts come out.

3. Place the ditch light bracket under the hinge and align the holes with the hood hinge. Adjust the bracket to leave a slight gap at the back of the hood before tightening.

*See back for further instructions.*

4. Secure the bracket and hood hinge using the factory bolts, ensuring the hood hinge lines up with the tape.

5. Remove the tape and repeat the steps on the other side to complete the installation.

6. Once the brackets are mounted to the hood, refer to the Universal Bracket Info/Mounting Guide, to mount your pods onto the bracket.

A small cutout has been designed on each bracket to aid in wire routing. Use the included zip-ties to secure the wiring away from the hood hinge.

**NOTE:** Do not use automatic car washes with this kit installed.

Please contact **Diode Dynamics** should you have any questions about the installation or wiring process, at **314-205-3033** (10a-5p CST) or **contact@diodedynamics.com**.
