### **INSTALLATION INSTRUCTIONS**

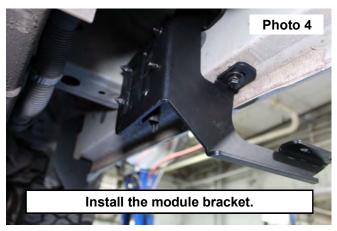

- 1. Locate the step brackets and wiring harness. See Photo 1.
- 2. Install the module on to the step bracket using (4) of the supplied bolts and (4) nuts. See Photo 2.

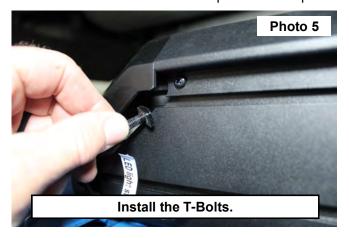

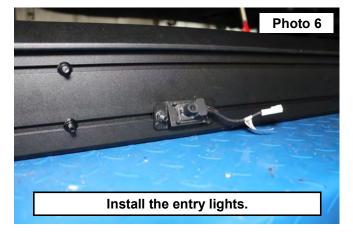

- Install the (Drivers side shown) first and second step brackets using (2) of the supplied 8mm Bolts, lock washers and flat washers. Hand tighten loosely. See Photo 3.
- Install the step bracket with the module mount in the third position of the vehicle using (2) of the supplied 8mm Bolts, lock washers and flat washers. Hand tighten loosely. See Photo 4.

- 5. Install the T-Bolts into the step. (8) bolts will be installed into the track on the body side of the step. (4) bolts will be installed on the outer side of the step. **See Photo 5.**
- 6. Place the (2) entry lights onto (2) of the bolts and secure using (2) of the flange nuts. The entry light will need to be in-between the front and rear step mounts and pointed in the outward position. **See Photo 6.**

- Place the step onto the mounting brackets. Placing the hardware into the slotted holes. Secure the step using the supplied flange nuts on each of the mounting brackets. See Photo 7.
- 8. Center the step to the body of the vehicle and tighten all step hardware. See Photo 8.
- 9. Install the opposite side step mounting brackets to the body and the step.

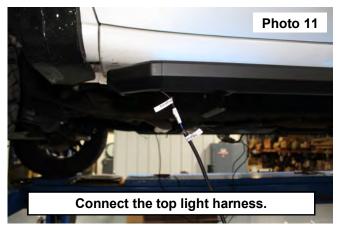

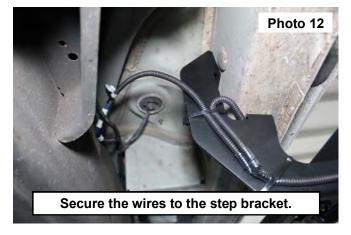

- 10. Connect the light wiring harness to the module. Connect the power wires to the battery. See Photo 9.
- 11. Plug the harness to the (4) entry light lights on each side of the vehicle. See Photo 10.

- 12. Route the harness to the (top step plate light) located at the front of the step connector. See Photo 11.
- 13. Secure the routing of the wires to the step brackets using the supplied cable ties. See Photo 12.

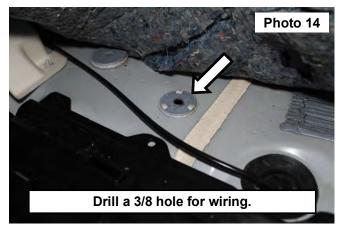

- 14. Remove the front scuff plate from the interior of the vehicle. See Photo 13. Repeat on passengers side.
- 15. Lift the carpet to expose the floor of the cab. Drill a 3/8" hole into the plug for an access hole for the light wiring harness plugs. **See Photo 14.** Repeat on passengers side.

- 16. Place the harness through the hole drilled in the plug. See Photo 15. Repeat on passengers side.
- 17. Select a location by the latch on the front door and place the sensor. Use the double sided tape on the back of the sensor to apply to the cab of the vehicle. **See Photo 16.** Repeat on passengers side.

- 18. Align the door magnet with the sensor applied by the latch. *Notes:* The magnet can be taped onto the door to set the correct placement before the double sided tape is applied. Place the magnet onto the door using the double sided tape on the back of the magnet. **See Photo 17.** Repeat on passengers side.
- 19. Select a location for the rear door sensor under the door check stop limiter and place the sensor to the cab of the vehicle. Use the double sided tape on the back of the sensor to apply to the cab of the vehicle. See Photo 18. Repeat on passengers side.

- 20. Align the door magnet with the rear sensor. **Notes:** The magnet can be taped onto the door to set the correct placement before the double sided tape is applied. Place the magnet onto the door using the double sided tape on the back of the magnet. **See Photo 19.** Repeat on passengers side.
- 21. Replace the interior scuff plate. See Photo 20. Repeat on passengers side.

# **Rough Country Bluetooth Step App Instructions**

## Thank you for choosing Rough Country for all your vehicle needs.

Please read instructions before use to familiarize yourself with the functions and features of the app for your Rough Country Bluetooth Steps. If question exist, please call us @1-800-222-7023. We will be happy to answer any questions concerning this product. App is available for download and intended for use with both IOS and Android devices.

RC light Step

### **App Instructions**

- 1. Download the app from the appropriate platform for your device. The RC app name is "RC light Step".
- 2. Open the app.
- 3. First time user login screen will display.
- 4. Click Agree to accept.

Click Agree to accept and proceed to the next step

- 5. Make sure Bluetooth is enabled on your device.
- 6. In app click "Add Device" of device and scan for the RC light Step. Bluetooth name is RC light step.
- 7. When located select "Connect".

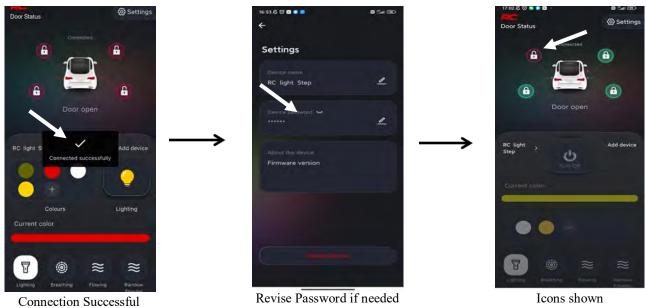

Select Add Device

8. Pair with password "123456" for first time use. **Note.** The passcode can be changed in the settings of the app.

- 9. After connecting to the steps the "Connected Successfully" message will appear.
- 10. Go to "Settings" and the password can be changed in this location if desired. Go back to the main screen.
- 11. On this screen you will notice the icons will show when a door is open or closed. Unlocked is open and locked is closed.

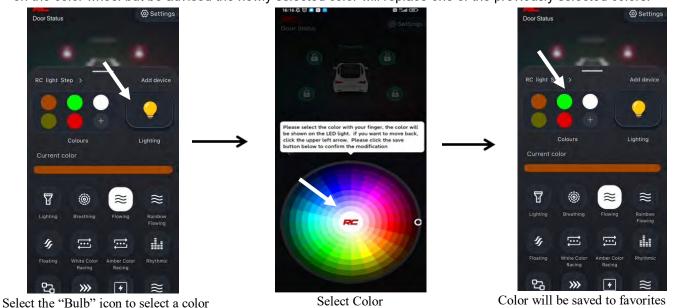

Select Device

Key in Temporary Password

- 12. The step lights can be manually turned on at any time even when the doors are closed if desired by selecting the Bulb icon.
- 13. To add custom colors to the favorites, click the "+" symbol on the Color section. Select the desired color and select "Save" at the bottom of the screen. **Note:** 5 presets can be saved. If another color is desired simply select that color on the color wheel but be advised the newly selected color will replace one of the previously selected colors.

- 14. Step LED color can be changed by simply selecting that color on the favorites. **Note:** The 1st three icons will accommodate the custom color selected. The other presets are pre-programmed with various other colors.
- 15. In addition to a custom color option, 11 other presets can be selected. Select different options for different effects.
- 16. The device name can also be changed to personalize the name of the steps. Revise name and select "Save". The revised name will be displayed on the App Home page
- 17. When the step lights are turned on manually by selecting the "Bulb" icon, the on time can also be changed from 1 second to 10 minutes on the settings screen to allow the step lights to remain on after exiting the vehicle. Select the desired timer on the settings page and select save.

Name will be displayed

18. Periodically updates to the app occur and this can be performed by clicking "Update" on the Settings Screen.
