## Cube Light Mounting Brackets (09-14 F150)

### Contents:

- (1) Left Bracket
- (1) Right Bracket

### Tools Required:

- 10mm Socket and Ratchet
- Cutting Tool (Air Saw, Rotary Tool, or Similar)

### Step 2\\

Hold the Cube Light Bracket up to the hinge and mark where the plastic cowl will need to be trimmed. Using a cutting tool, trim the cowl until the Cube Light Bracket aligns with the factory hood hinge bolts.

### Step 1\\

Locate the (2) 13mm hood hinge bolts. Using a marker, mark when the hinge is in relation to the chassis for ease of future re-alignment.

### Step 3\\

Carefully remove the hood hinge bolts and install the Cube Light Brackets. Align the hood hinge to the chassis using the mark made in Step1. \*\*Note: It may be helpful to have an assistant hold the hood. Repeat the process on the other side. Install is now complete.
