

REDROCK

REAR SEAT RELEASE KIT

(F150 SUPER CAB 15-18, F150 SUPER CREW 09-18)

INSTALLATION INSTRUCTIONS

CONTENTS

- (1) Pull Tether
- (1) Mounting Bracket

TOOLS REQUIRED

- Socket Wrench
- T30 Torx Socket

SKU # T546785

STEP 1

Release the rear back rest by reaching behind the seat and pulling on the short tether attached to the release lever.

NOTE: Removing the headrest helps with access behind the back rest.

STEP 2

Remove the original release tether by sliding it rear the front of the vehicle. Remove the (2) T30 Torx bolts securing the lever to the seat.

STEP 3

Attach the tether to the same location as the original, then slide the mounting bracket onto the release lever.

STEP 4

Reinstall the (2) T30 Torx bolts to secure the lever and release kit to the seat.

STEP 5

Push the seat back into position, the tether will now be above the seat. Installation is now complete.

NOTE: The seat lever catch may have to be adjusted once complete if the seat does not latch initially. The catch bar behind the seat moves easily.
