

OEM REPLACEMENT LICENSE PLATE LAMPS

(2015-2021 F-150)

INSTALLATION INSTRUCTIONS

CONTENTS

- (2) Light Housings
- (2) Light Sockets
- (2) Light Bulbs

TOOLS REQUIRED

Flathead Screwdriver

STEP 1

Using a flathead screwdriver, depress the plastic mounting tabs inward to release the side of the license plate lamp from the bumper.

STEP 2

Depress the electrical connector tab, then pull the electrical connector away from the vehicle license plate light socket.

STEP 3

Plug the new license plate lamp assembly into the vehicle wiring harness. Ensure electrical connector audibly clicks into place. Push the new license plate lamp into the bumper light cutout.

STEP 4

Repeat steps 1-3 to the opposite side of the vehicle.

Installation is now complete.
