PROVEN GROUND

FRONT AND REAR CALIPER COVERS
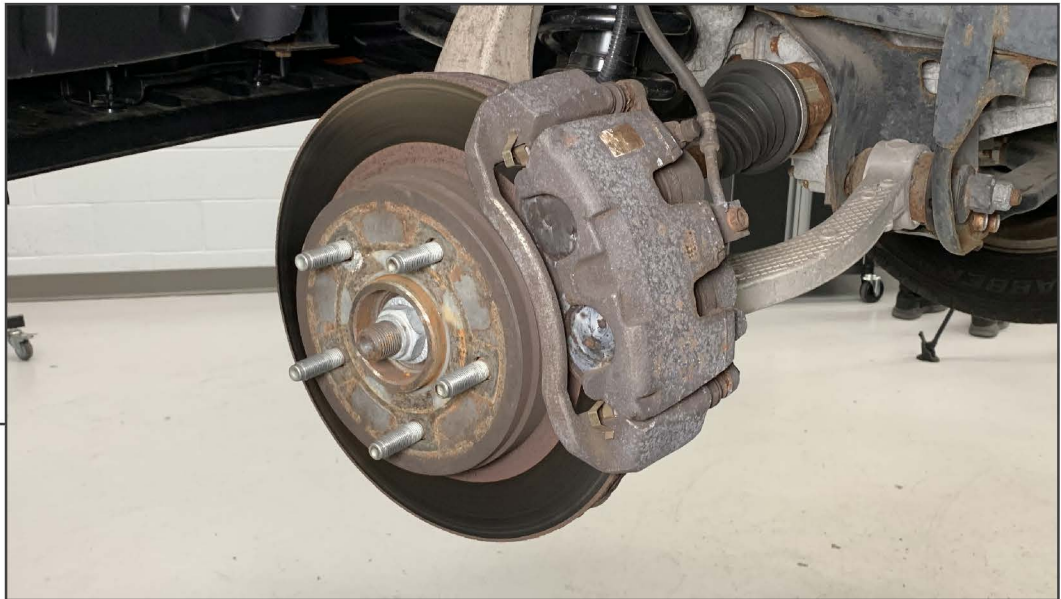

(2021-2023+ F-150)

INSTALLATION INSTRUCTIONS

CONTENTS

(1) LH Front Caliper Cover
(1) RH Front Caliper Cover
(1) LH Rear Caliper Cover
(1) RH Rear Caliper Cover
(1) Allen Key
(1) Wrench
(1) Extra Allen Bolt & Lock Nut
(1) Extra Flange Nut & Stud

TOOLS REQUIRED

8mm Wrench (Provided)
Allen Key (Provided)
Floor Jack & Jack Stands
Lug Nut Wrench
Rubber Mallet

**STEP 1
(FRONT)**

Lift and support the vehicle using a floor jack and jack stands. Remove the wheel from the vehicle to expose the brake caliper.

STEP 2

Prepare the caliper cover for installation by removing the nut and bolt from the top to separate the clamp. Set the removed bracket and hardware aside for installation later.
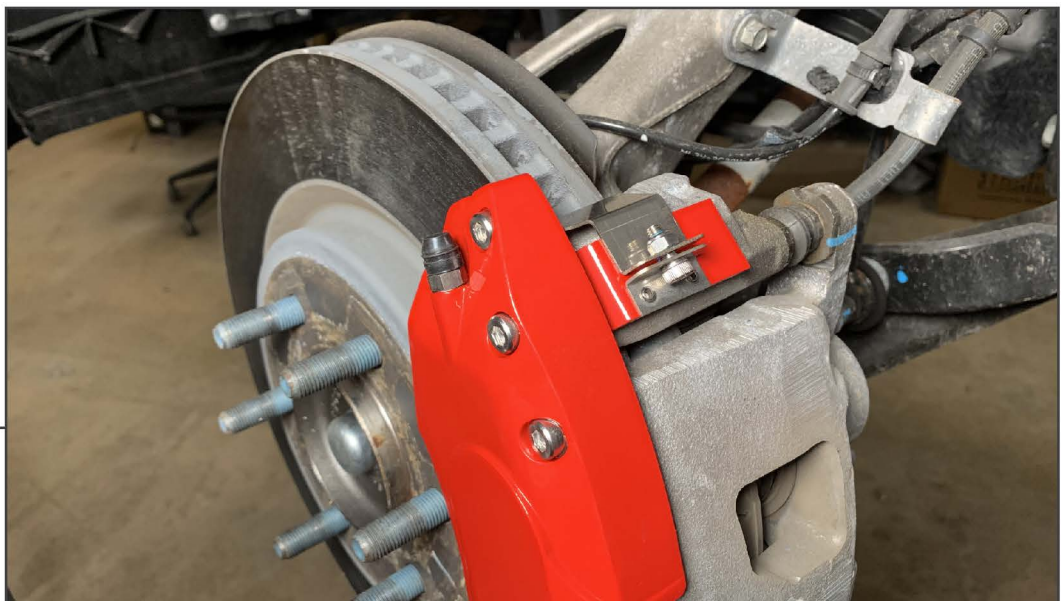

STEP 3

Place the lower caliper cover bracket around lower caliper bracket. Using a rubber mallet, lightly tap the caliper cover upwards to ensure proper fitment for the upper bracket.

Note: Ensure the bleeder on the caliper cover is towards the top.

STEP 4

Using the previously removed bracket and hardware, secure the top of the caliper cover to the vehicle caliper bracket. Tighten the hardware until the cover is secure.
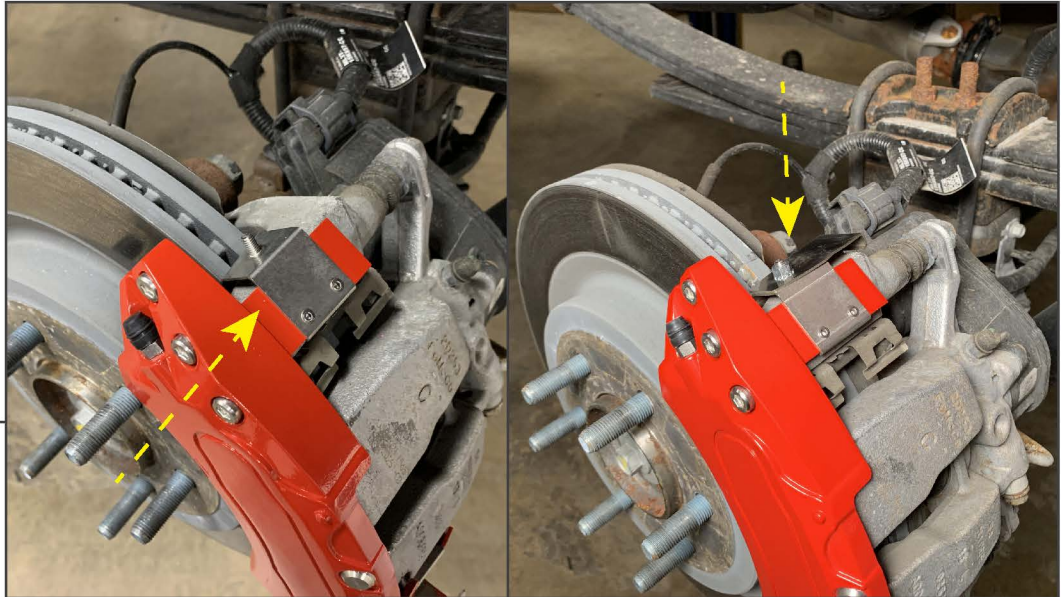

STEP 5

Repeat steps 1-4 for the remaining front caliper cover.

**STEP 6
(REAR)**

Lift and support the vehicle using a floor jack and jack stands. Remove the wheel from the vehicle to expose the brake caliper.

STEP 7

Remove the pre-installed mounting brackets, then slide the caliper cover onto the vehicle caliper bracket.

Using the provided mounting brackets, place the brackets around both sides of the vehicle caliper bracket, while aligning the caliper cover studs. Evenly tighten the (1) flange nut on both mounting brackets until secure.

STEP 8

Repeat steps 6-8 for the remaining rear caliper cover.

Installation is now complete.
